Spoiler Bar ASS'Y

설치사진 Actual picture

Bending Bar & Support Bar를 Roll 내부에 설치하여 고속 회전시 Rimming 현상으로 인한 응축수를 Casting 하여 Drain 효과를 극대화함으로써, Dryer 표면 온도를 높이는데 설계 되었습니다.

ILDO Spoiler bar is installed inside of a roll as connecting bent bar and support bar. It helps draining of condensed fluid and increasing temperature. It maximize Drain effect by casting condensed fluid which is rimmed at high speed, that makes the dryer high temperature on the surface.
